### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

Claims 12-21 have been canceled as directed to a non-elected invention.

The election was made without traverse.

*End of Amendment.*

### REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance: None of the prior art of record, singly or combined, teach or suggest a method of forming a covalent bond between a polymer and a substrate surface wherein the covalent bond is formed from evaporation of solvent from a solution containing the substrate and a functional organic polymer containing cationic exchange functional moieties or precursors. The bond formation taught in the Afeyan patent is by reflux not evaporation. The Imai patent (US 3,945,927) teaches a method of coating bearing ion-exchange groups, which method involves solvent evaporation; however the ion-exchange groups are introduced after the coating was formed by further chemical treatment of the coating. The Small patent (US 4,705,636) teaches a covalent bond formation, but the cationic exchange functional group is carried on the substrate not on the polymer as claimed.
